Desi nuskhe is an astute word for simply and easily available resource usage, deriving its root from primordial ancient practices techniques. Often addressed as Gharelu nuskhe, coming up from same root that affirms its base on curing and treating ordinary to severe diseases following old untimely sagacious words and work. The variety of foods, spices and dishes that are native to India makes Indian food one of the most wholesome foods in the world; It brings out innovative and unheard definition of fruits spices and vegetable which are not taken or perceived so. All fruits, spices and vegetables have a unique benefiting exclusive quality which when put in right form and place work miraculously.

The world has evolved from prehistoric era of stones to modern technically savvy human race. Idea here is to make a comprehensive knowledgebase to generate awareness and not being mere bamboozled by all the advance medicine techniques as the only remedy. Apart from safeguarding our endangered cultural heritage this idea will provide a platform to young minds to embrace the knowledge and culture also paving the way to an active nodal scientific studies and researches.
